

KNOW WHAT TO FLUSH

The toilet is only meant to flush the 3 P's – pee, poop, and (toilet) paper. Over time, toilets have become a disposal of all things. Nonflushable items can cause pipes to clog, waste water (up to 5 gallons per flush), and can have a huge impact on our sewer lines.

DO NOT FLUSH

- Sanitary products, paper towels,
- Prescription Drugs or OTC Meds
- Kitty litter
- Dental floss or hair
- Vape pens
